

## Energy Management & Optimisation Services

**Synergie Environ** is actively involved in the development of bespoke energy management and optimisation services to a range of public and private sector clients. Our growing team has many years practical experience in energy auditing, building energy engineering and energy performance assessment. We have in-house BREEAM, Energy Performance Assessment and Certification capability, including access to a range of Dynamic Building Simulation software, and have Advisors registered to provide energy advice and support through the Energy Saving Trust.

### Specialist capabilities:

Examples of recent Synergie project experience in energy optimisation:

- Provision of high level management training on Carbon Management and Reduction Strategy and Standards;
- Design and delivery of industrial and commercial energy audits - e.g. to > 10 clients in the highlands & Islands through the Highlands & Islands Resource Efficiency Project;
- Design and delivery of bespoke energy sub-metering and monitoring / targeting systems and associated web-based software - e.g. design and installation of a 60-point electricity, gas and nitrogen monitoring system to a large industrial site;
- Building performance assessment and the delivery of Energy Performance Certificates and Recommendations Reports to a range of large public sector clients;

### Client base:

Examples of recent Synergie clients in energy optimisation:

- West Lothian Council
- Stirling Council
- Glasgow University
- South Lanarkshire College
- Walkers Shortbread
- SGL Group
