

Resource Efficiency & Environmental Management Services

Synergie Environ is actively involved in assisting clients to achieve cost savings through improved resource efficiency and environmental management - i.e. material wastes prevention, energy conservation and water / effluent minimisation. Our team has many years practical experience in resource efficiency strategy, auditing, planning and implementation across both public and private sectors. We are also experienced in the development and implementation of cost-effective environmental management systems - e.g. ISO14001.

Specialist capabilities:

Examples of recent Synergie project experience in resource efficiency:

- Strategic and sustainable waste management strategy, planning and implementation - e.g. Area Waste Planning and the development and implementation of Local Authority Waste Strategies and Plans;
- Design and delivery of pan-regional resource efficiency support for Small to Medium-Sized Enterprises (SME's) - e.g. the Highlands & Islands Resource Efficiency Project (HIREP);
- Design, specification and installation of SMART utility metering and Automated Monitoring & Targeting (a M&T) systems;
- Sustainable construction planning - e.g. Highlands & Islands Sustainable Construction Plan.

Client base:

Examples of recent Synergie clients in resource efficiency:

- Highlands & Islands Enterprise
- Scottish Environment Protection Agency
- Equateq Ltd
- Ocean Kinetics
- Walkers Shortbread
- Cairngorm Mountain Ltd
- Visit Scotland
- SGL Group
